Nanomedicine

What is it and
what can it be used for?

Join us!

AGENDA

10h00 Presentation of the *The Atlantic KET MED* project

10h15 *Nanomedicine Today and Tomorrow*

Ruth Schmid, Chairwoman of ETP Nanomedicine

Ruth Schmid is the current chair of the European Technology Platform on Nanomedicine (ETPN) and a Past President of the Controlled Release Society (CRS). She is also Vice President Marketing at SINTEF in Trondheim, Norway, with a special responsibility for the field of medical technology, including nanomedicine at SINTEF. She has undergraduate education in organic chemistry and a PhD in physical organic chemistry from ETH Zürich, Switzerland.

10h45 *Magnetic nanoparticles for thermotherapy in solid tumors - The Nocanther case*

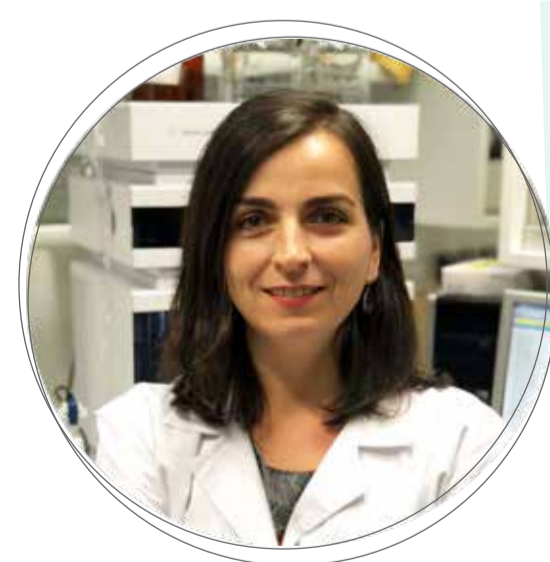

Angel del Pozo, Deputy Manager of Programs Strategy - BioKeralt Research Institute

Angel Del Pozo generates new business opportunities for his company by trying to convert innovation in Healthcare, nano, biotechnology into new solutions for the patients. He leads the Safe-N-Medtech OITB and has contributed to obtain 8 FP7 and H2020 projects for his group in the last 5 years.

11h05 *DIVERSA, Delivery Innovation for VERsatile Solutions in Advanced therapeutics*

María de la Fuente Freire, Head of the Nano-Oncology and Translational Therapeutics Unit, Health Research Institute of Santiago de Compostela (IDIS)

Maria de la Fuente Freire has a degree in Pharmacy (University of Santiago de Compostela-USC, Spain, 2001) and obtained her PhD in Pharmaceutical Technology in 2006 (USC). Maria was a visiting scientist in several institutions, as the University of Valladolid (Spain, 2003), the University of Kuopio (Finland, 2004), and the Institute of Biomedical Research "Alberto Sols" in Madrid (Spain, 2006). She was working as a postdoctoral researcher at the UCL-School of Pharmacy, London (UK, 2007-2010), and CIMUS, USC (Spain, 2010-2012).

11h30 Q&A and Closure

The event is powered by:
